

Our Election Priorities

Shropshire
Wildlife Trust

We're appealing to all political candidates in Shropshire to put nature recovery at the heart of their policies for the upcoming general election. Here's what we're calling for:

Bring back our lost species

put nature into recovery in order for lost and declining species to thrive again

Enforce the law on river pollution

empower environmental watchdogs to monitor and respond to pollution incidents

Fund wildlife-friendly farming in full

increase the budget for wildlife-friendly farming to ensure a fair transition for farmers

Give every child the best start in life

embed outdoor learning in schools for happier children who understand their impact on nature

Tackle the climate emergency

put climate change at the top of the political agenda to combat flooding and drought
